## **DETAILED ACTION**

## Specification

1. The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-5,11,13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Bohler (US 4,439,562).

Application/Control Number: 10/517,116 Page 3

Art Unit: 1751

Bohler teaches dyeing polyester with dyestuffs of formula lb where the R substituents are hydrogens and the Me substituents is nickel (column 4, example 1). Bohler further teaches producing polyester varns from the dyed polyester.

Accordingly, Bohler anticipates the material limitations of the instant claims.

4. Claims 1-5,11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Papenfuhs et al. (US 4,265,632).

Papenfuhs et al. teach dyeing polyester with dyestuffs of the instantly claimed formula (I) (columns 6-8, examples). Papenfuhs et al. further teaches producing polyester filaments, fibers and shaped articles from the dyed polyester (column 6, lines 5-20).

Accordingly, Papenfuhs anticipate the material limitations of the instant claims.

5. Claims 1,2,6,7,11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Shirasaki et al. (US 5,942,011).

Shirasaki et al. teach dyeing polyester fibers with dyestuffs of the copper complex type and C.I. Disperse Yellow 64, C.I. Disperse Red 60 and C.I. Disperse Blue 56 (column 7, example 13).

Accordingly, Shirasaki anticipate the material limitations of the instant claims.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

7. Claims 1-17 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Mach et al. (2001/0004780).

Mach et al. teach dyeing polyesters with dye mixtures comprising C.I. Solvent Brown 53 and C.I. Disperse Violet 57 (page 1, paragraphs 0010-0012). Mach et al. further teach printing the textiles with the same dye combinations (page 1, paragraph 0014). Mach et al. further teach producing military camouflage articles with the dyed fibers (page 1, paragraph 0009). While Mach et al. is silent as to producing clothing from the textiles, this would be encompassed by the teachings of Mach et al. since camouflage military uniforms are commonly produced from dyed polyester.

Accordingly, Mach et al. anticipate the limitations of the instant claims.

In the alternative, if the teachings of Mach et al. are not sufficient to anticipate the material limitations of the instant claims, it would have been nonetheless obvious to select the instantly claimed components from the teachings of Mach et al. to arrive at the instant invention because Mach et al. teach similar textiles dyed by similar dyes with similar methods. Mach et al. further teach producing camouflage articles with high fastness levels and methods that are more economical. It would further have been obvious to produce clothing from the dyed polyester textile because military uniforms are commonly camouflage and polyester is a well-known component of textile materials.

Art Unit: 1751

One of ordinary skill in the art would have been motivated to modify the teachings of Mach et al. to arrive at the instant invention absent unexpected results.

8. Claims 1-3,7,11 and 12 are rejected under under 35 U.S.C. 103(a) as obvious over Reinert et al. (US 4,895,981).

Reinert et al. teach dyeing polyester with metal complex dyes mixed with disperse dyes, where the metal may be copper, nickel or chromium and where the disperse dye may be C.I. Disperse Yellow 142, C.I. Disperse Blue 60, C.I. Disperse Violet 57 or Disperse Red 302 (column 4, lines 64-68; column 5, lines 1-25; column 10, lines 15-30)

Reinert et al. do not teach all the instantly claimed embodiments in a single example.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to select the instantly claimed components from the teachings of Reinert et al. to arrive at the instant invention because Reinert et al. teach similar textiles dyed by similar dyes with similar methods. Reinert et al. further teach producing dyed articles with improved photochemical stability. It would further have been obvious to produce clothing from the dyed polyester textile because Reinert et al. teach producing knitted or woven fabrics, which are well known component of clothing. One of ordinary skill in the art would have been motivated to modify the teachings of Reinert et al. to arrive at the instant invention absent unexpected results.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Amina Khan whose telephone number is (571) 272-

5573. The examiner can normally be reached on Monday through Friday, 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Douglas McGinty can be reached on (571) 272-1029. The fax phone

number for the organization where this application or proceeding is assigned is 571-

273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
